Midnight Tea

Patchwork Fields

Overview

I DESIGNED AND BUILT THE AUTUMN COLLECTION LAUNCH FOR MY OWN ART SHOP.

Sixteen animal paintings as fine art prints

Collection pages, banners and launch graphics

Artist, designer and store builder

From the first painting to the finished collection page

Moonwatch

The goal

A STORE EXPERIENCE THAT FEELS LIKE MY PINTEREST BOARDS.

Visitors who click a pin land somewhere familiar

Browse all sixteen pieces in one beautiful place

Feature the collection across key shop pages

Showcase the collection in the main menu

Little Herd

What I made

A COMPLETE COLLECTION AND
THE LAUNCH EXPERIENCE AROUND IT.

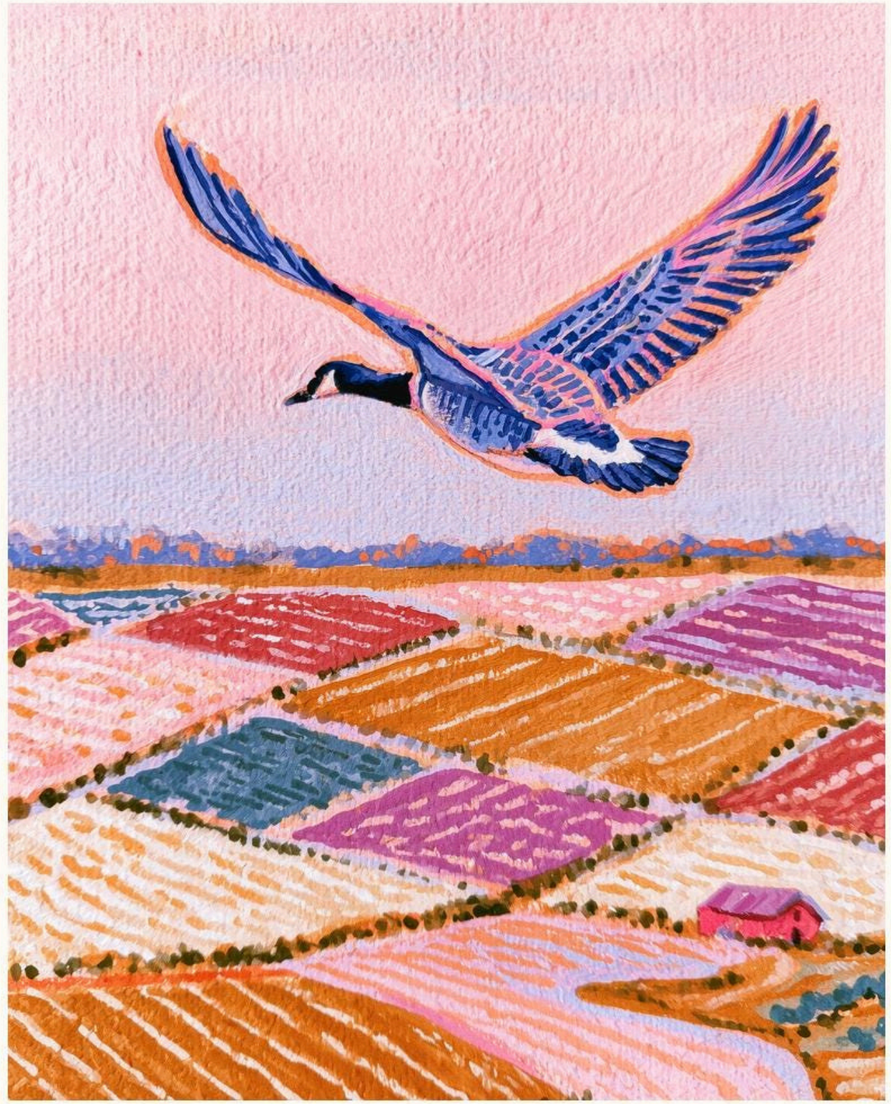

Sixteen animal paintings in a shared autumn palette, each sold as its own print

Homepage banner above Soft and Luminous, now positioned in the middle of the page

A View collection page styled like my Pinterest pin overview

Highlights on Shop All, the physical prints page and the main menu

Coordinated banners for Etsy and Pinterest in the same autumn colors

Patchwork Fields

Key design decisions

match the pins: each print shows its pinterest pin on its own soft pastel color

let the art lead: titles are already on the pins, so the cards stay clean

one layout, three places: a short home page banner and a full four-column page built from the same section

keep the current work on top: the newest collection first on the page

Under the hood

A custom Shopify section I coded for the collection

One section, two layouts: a banner for the home page and a full collection page

Editable in the theme editor: heading, columns, spacing, button and which collection to show

Picks each product's pin image automatically, with the main photo as a backup

Responsive grid: 4 columns on desktop, 3 on tablet, 2 on phone

Lazy-loaded images in several sizes so the page stays fast

```
for img in product.images
  if img.width == 1000 and img.height == 1500
    assign pin = img
    break
  endif
endfor
if pin == blank
  assign pin = product.featured_image
endif
```
